

Kids Cafe Cooking Club Afterschool Enrichment Program

Does your child like to help you in the kitchen? Kids Cafe Cooking Club is a hands-on program that teaches culinary arts through fun interactive experiences. Learning how to cook involves math, science, and other important skills. But our students just say that it is *Fun!* They will learn to prepare and taste some of their favorite foods, participate in a number of interactive activities, and create *new dishes* to try that will inspire them!

We are really missing our in person classes right now, but we are excited to still continue to bring our students and their families our cooking classes via zoom. Each class offers easy to find ingredients and clear step-by-step instructions. Recipes can be adapted to suit your families needs and taste buds. We encourage our students to organize and complete each task from start to finish, including helping with the clean up too! 😊

You can choose from a variety of fun experiences such as bread baking, pies, cakes, cookies, family favorites, and *crazy good* homemade snacks! All classes include a list of supplies, ingredients, recipes, and a Zoom Link. Class dates and times vary and include weekday, evening, and weekend classes. Each month we offer something new, but you have the option to join only the classes that *you'd like* to try.
